Project Management Fundamentals Course

Powered by our expert instructors!

Learn the essentials of project management in-person, online, or in coordination with our Microsoft® Project training!

During this training experience you will…

- Receive instruction from powerful, experienced trainers
- Learn Project Management Institute (PMI®) principles
- Be introduced to PMI® terminology and standards
- Receive in-depth training on project management processes
- Experience hands-on exercises that drive home principles
- Have the option to receive training online or in-person
- Have the option to combine your fundamentals learning with Microsoft® Project hands-on exercises

We love to teach fundamental principles using hands-on exercises that involve planning and running a project from start-to-finish with the help of tools like Microsoft® Project!

PMI® is a registered trademark of the Project Management Institute and Microsoft® Project is a registered trademark of the Microsoft corporation.

Why do we teach Project Management Institute (PMI®) principles?

The **Project Management Institute** is an **internationally acclaimed** professional organization that has solidified Project Management as a profession. The principles codified by this organization represent the **gold standard** for those who work as project managers! Furthermore, credentials from this organization set project managers apart from their peers. With this in mind, our developers have created a course that teaches fundamental PMI® principles and helps our students become familiar with processes and standards that are accepted throughout the project management world and across every industry.

Top 10 immediate benefits:

1. Learn from experienced, successful instructors

2. Participate in a (customized) case study

3. Experience how to properly plan a project

4. Receive hands-on practice with planning tools

5. Practice using cost and resource-loaded schedules

6. Participate in a risk management planning exercise

7. Learn how to communicate/work with stakeholders

8. Experience the thrill of executing/controlling a project

9. See how PMI® principles apply in the real world

10. Internalize PMI® concepts and principles

11. Receive insights into how your company might be able to standardize processes, tools, and terminology to align with PMI® standards

This program was built by Petersen Training LLC, which is an Authorized Training Provider (ATP) for the Project Management Institute.

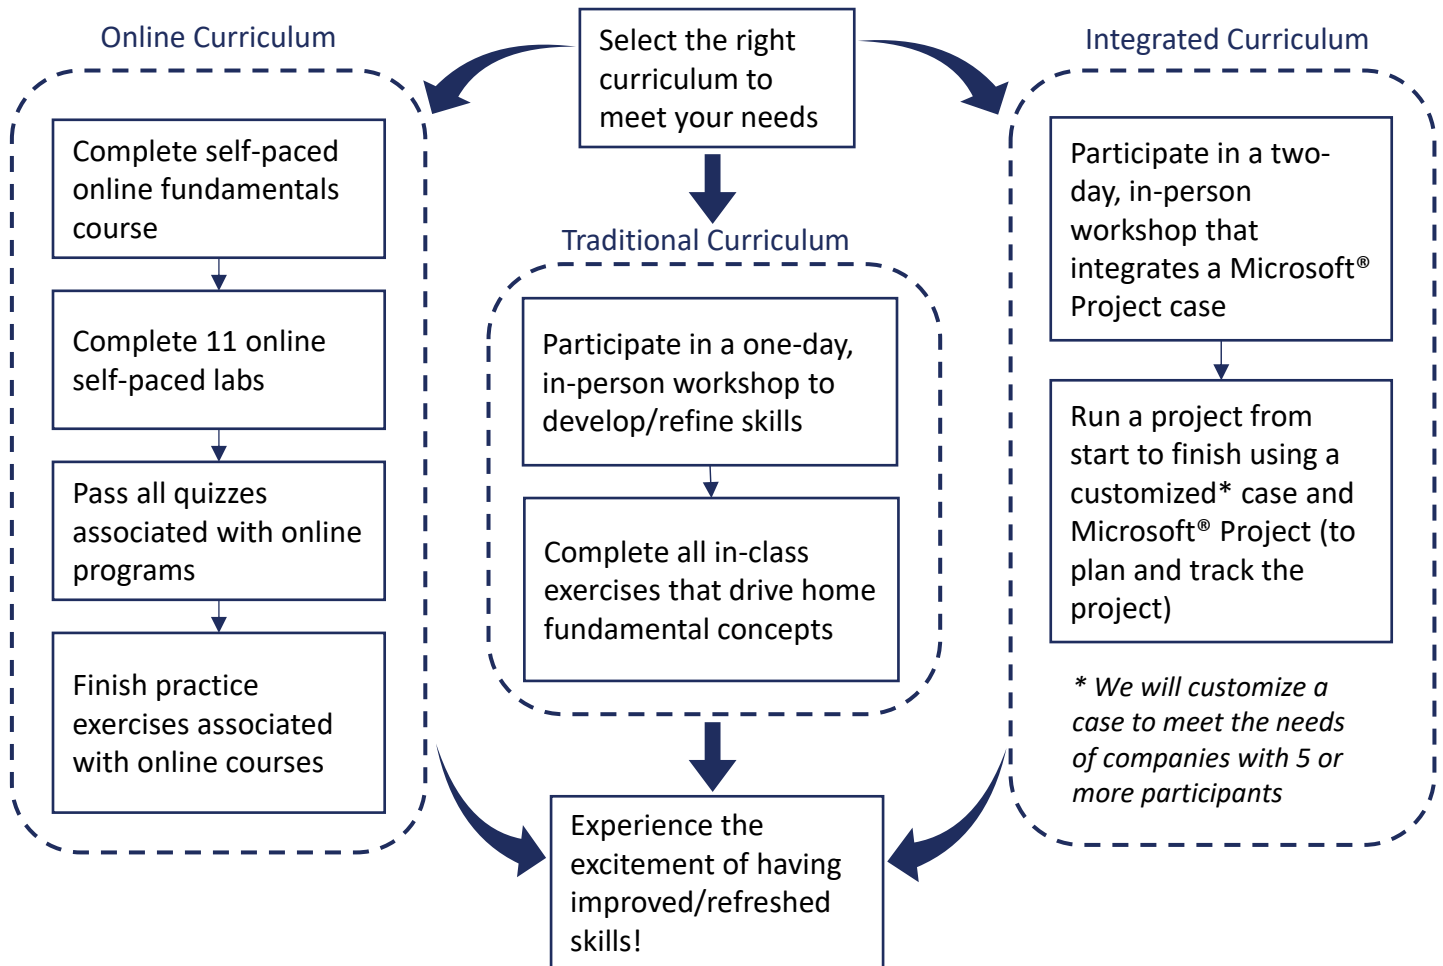

How do we help you acquire Project Management skills?

People learn skills through repetitive practice. During our Project Management Fundamentals courses, we incorporate hands-on exercises that allow students the opportunity to practice the principles we teach. These exercises become even more powerful when we integrate Microsoft® Project training into the classroom environment. This tool allows us to help students practice scope development (through the creation of a WBS); it allows students to experience how they can plan time, cost, and resource parameters (through the development of a cost and resource-loaded schedule); and, it helps them practice how to monitor and control a schedule through the entire project lifecycle (as they update and adjust the schedule).

**Your source for mastering fundamental project
management principles, standards, and processes!**

Learn through methods that meet your needs!

Our Project Management Fundamentals curriculums are designed to meet your needs; you can select from one (or a combination) of the curriculum paths shown below:

Online Curriculum

Complete self-paced online fundamentals course

Complete 11 online self-paced labs

Pass all quizzes associated with online programs

Finish practice exercises associated with online courses

Select the right curriculum to meet your needs

Traditional Curriculum

Participate in a one-day, in-person workshop to develop/refine skills

Complete all in-class exercises that drive home fundamental concepts

Integrated Curriculum

Participate in a two-day, in-person workshop that integrates a Microsoft® Project case

Run a project from start to finish using a customized* case and Microsoft® Project (to plan and track the project)

* We will customize a case to meet the needs of companies with 5 or more participants

Experience the excitement of having improved/refreshed skills!

Who should attend?

This course is designed for those who need to build (or refresh) essential project management skills. However, even experienced project managers will gain benefit from this course when we integrate Microsoft® Project planning, executing, and controlling exercises into the curriculum (this becomes even more powerful when we customize the case for our clients).

Onsite delivery for teams?

Hundreds of companies have used our workshops to amplify their private, onsite training; these opportunities are low-risk, high-return events that can save you real time and money on your projects. We also make it easier on your budget by providing group discounts. Please contact Bill Bialcak using the information shown below to schedule an event for your organization.
