Advanced Construction Management Professional (ACMP)

A credential offered by the
National Association of Construction Professionals (NACP)

This advanced construction management training and credentialing experience will help you differentiate yourself as you seek more senior positions!

During the credentialing process you will...

- Participate in advanced simulation training
- Receive an instructor assessment of your performance
- Complete an online self-assessment
- Complete an online scenario-based-assessment
- Receive a supervisor assessment
- Receive a consolidated assessment report
- Successfully navigate the ACMP credentialing process

This credential will help employers know that **you are ready for more responsibility!** It will also benefit your employers as they highlight your advanced credentials in proposals.

Are you looking to supercharge your construction management résumé and qualifications? If so, the ACMP is for you!

How do you register for this credentialing process?

The easiest way to register is to contact Bill Bialcak at Petersen Training. Bill will provide personalized support throughout your credentialing process (his contact information is at the bottom of the page). Another easy way to register is to fill out the registration form at nacp-construction.org. During the registration process, the NACP will review your request, Westminster College will accept your credentialing fees, and Petersen Training will enroll you in our simulation training and assessment experiences. *As a note: your application must provide a point of contact who can verify that you have at least two years of experience managing construction teams.*

Top 10 trained and assessed topics:

1. Construction standards and terminology

2. Stakeholder management

3. Leadership, management, and communication

4. Scope development and management

5. Schedule development and management

6. Cost estimating and management

7. Resource planning and management

8. Quality and safety planning and management

9. Contract and documentation management

10. Managing and resolving issues related to budgets, schedules, quality, resources, stakeholders, and risks
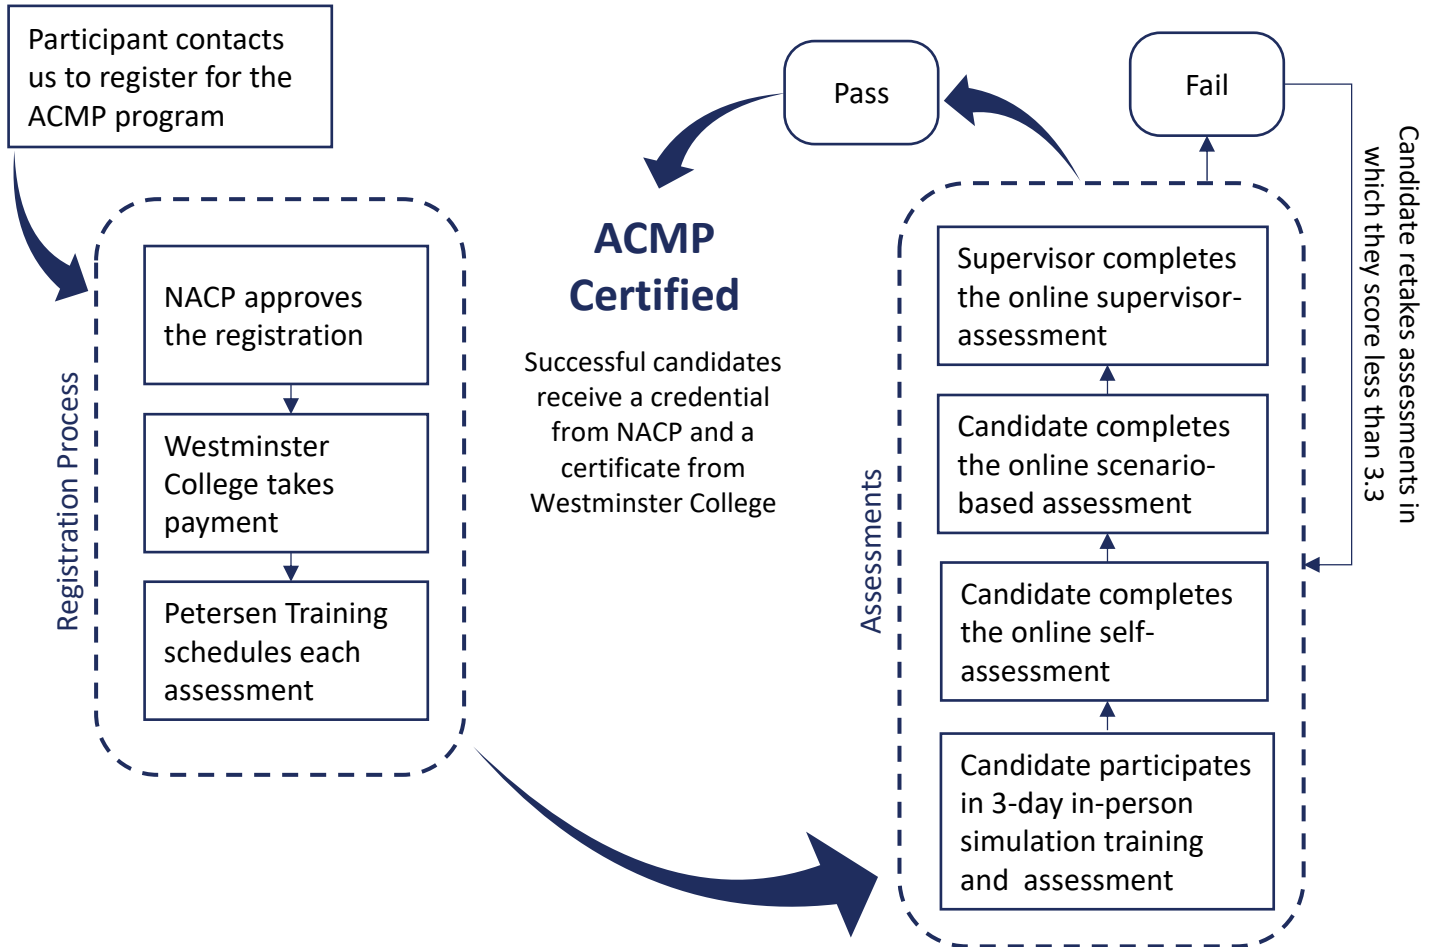

This credentialing program is based on the **NACP Construction Management Professional Standard**. Participants are introduced to this standard during the BCMP credentialing process. All of the training, assessments, and reports associated with the ACMP will refer back to principles taught in this standard.

ACMP Details…

In this program, participants complete four assessments that can be taken in any order. The first is a **3-day simulation** training and assessment event; during this process, students run a simulated project and receive an overall assessment from their instructor. The second is an online self-assessment. The third is an online scenario-based assessment. The fourth is a supervisor assessment. Participants receive a comprehensive assessment report that covers their overall performance in all four phases. The average <u>aggregate score from these assessments must be better than 3.3</u> for a candidate to receive the ACMP credential. Those who do not achieve this score must wait 6 months after receipt of the final report to retake any assessments in which they scored lower than 3.3 (at a cost of $200 for online and $500 for the in-person simulation).

Our training and assessment process...

The following diagram provides a visual depiction of the training and assessment process for the ACMP credential:

Registration Process

Participant contacts us to register for the ACMP program

- NACP approves the registration
- Westminster College takes payment
- Petersen Training schedules each assessment

Pass **Fail**

Candidate retakes assessments in which they score less than 3.3

ACMP Certified

Successful candidates receive a credential from NACP and a certificate from Westminster College

Assessments

- Supervisor completes the online supervisor-assessment
- Candidate completes the online scenario-based assessment
- Candidate completes the online self-assessment
- Candidate participates in 3-day in-person simulation training and assessment

Who should pursue the ACMP?

This credentialing process is for those who have at least two years of experience leading construction teams. It is specifically designed to help construction managers receive an overall assessment of their strengths and weaknesses, while also showing their value to their company leadership. This credential will help those who obtain it to differentiate themselves when seeking positions of higher responsibility.

Benefits for my company?

This program provides significant benefits for your company. The first of these is standardization of terms and processes. The second is increased knowledge and skills of construction management team members. The third, and most important, benefit is the ability of your company to list your credentials in proposals—to set them apart from the competition when pursuing future construction work.

Pricing Sheet

Construction Management Program Prices:

Program	Description	Price
Advanced Construction Management Certificate	This program involves cutting-edge simulation training and assessments to help participants achieve the Advanced Construction Management Certification (ACMP) credential through the National Association of Construction Professionals	$1,700 (In addition to BCMP price)*
Basic Construction Management Certificate	This program requires the completion of online training and an exam; those who pass the exam receive the Basic Construction Management Professional (BCMP) credential through the National Association of Construction Professionals	$1,050

These represent the per-person prices for programs that come with certificates from universities or colleges and/or credentials from a nationally recognized professional organization. We cannot, therefore, offer group discounts on these programs.

* Those who pursue the ACMP credential must complete the BCMP program first. The total price for both programs is $1,050 + $1,700 = $2,750.
